

Online NFPA 1033 - Pro Board® certified course completion process.

Fire Wise offers training for the NFPA 1033 Standard Professional Qualification for 1033 Fire Investigator. Pro Board® Accredited Certification to this training standard is provided by the College of the Rockies (COTR).

Part One

Fire Investigation Origin and Cause (FIOC) Level I

- Complete the online knowledge-based curriculum
- Pass the online exam at the end of Level I

Part Two

Fire Investigation Origin and Cause (FIOC) Level II

When you have successfully completed Part One, you can begin FIOC- level II, which consists of a virtual fire investigation using 360-degree video technology as well as a series of assignments which include:

- answering written questions
- conducting a peer review of a technical fire report
- writing a technical fire investigation report based on the fire you investigated using the 360-degree technology
- preparing a PowerPoint presentation of your findings

When the assignments are complete, upload them to the FireWise Learning Academy portal. Once approved, FireWise will notify the College of the Rockies (COTR) that you are ready for evaluation.

The COTR will contact you through email.

Evaluation

The COTR evaluator will invite you to arrange an online meeting where you will present your findings using your PowerPoint presentation (created in Level two) over shared computer screens.

A written exam will be sent to your assigned proctor, who will administer it and return it to the evaluator.

After successfully completing all level one and two requirements, and passing the COTR evaluation, COTR will issue Pro Board®-accredited certificates for Professional Qualification NPFA 1033 Fire Investigator.
